Permits MUST be posted prior to the start of the work.**

Who Are You Going to Call?

Citizens can help report violations or problems they notice in their local streams before they cause more damage and pollution. Residents sometimes may be the first to recognize “illicit” discharges being directed into storm sewers or flowing out of storm sewer outfall pipes into streams. “Dry Weather Flows” (flows from outfall pipes after a 72 hour or greater period without rain) should be reported to your municipality for further investigation.

New storm water regulations from Pennsylvania’s DEP require that your municipality investigate more thoroughly potential illicit discharges (pollutants) into our streams. You can help by promptly reporting the following events to the authorities listed in the hotline boxes below. Here are some of the conditions that you should report and to whom they should be reported.
