WHO ARE YOU GOING TO CALL?

Citizens can help report violations or problems they notice in their local streams before they cause more damage and pollution. Residents sometimes may be the first to recognize "illicit" discharges being directed into storm sewers or flowing out of storm sewer outfall pipes into streams. "Dry Weather Flows" (flows from outfall pipes after a 72 hour or greater period without rain) should be reported to your municipality for further investigation.

New storm water regulations from Pennsylvania's DEP require that your municipality investigate more thoroughly potential illicit discharges (pollutants) into our streams. You can help by promptly reporting the following events to the authorities listed in the hotline boxes below. Here are some of the conditions that you should report and to whom they should be reported.

- Sediments leaving a construction site during rain events
- Spills, hazardous materials (DEP Spills or PEMA hotlines)
- Illegal dumping into water courses or storm sewers and other violations - Delaware County Conservation District. Send Photo If Possible (Aston Township, DEP)
- Observed pollution event or pollutants in stream (DEP)
- Dry weather flows from outfall pipes into streams (Aston Township)
- Clogged or leaking sewer lines (Southwest Delaware County Municipal Authority)
- Inadequately treated sewer effluent from treatment plant (Southwest Delaware County Municipal Authority, DEP)
- Dry weather flows from outfall pipes into streams
- Fish Kills (Fish Commission, DEP)
- Water Main Breaks (Aqua or Chester Water Authority)
